

# THE CATTLEMAN INDEX

## VOLUME XXXVIII, JUNE 1951-MAY 1952

**Editor's Note**—For quite sometime we have been besieged for help in locating information which has appeared in past issues of *The Cattleman*. These requests have come not only from our subscribers but from high school and college students, researchers, writers, advertisers and others interested particularly in historical and technical data.

It is, then, with a great deal of pleasure that we include in this issue, *The Cattleman's* first annual index to materials contained in Volume XXXVIII, June, 1951, to May, 1952, inclusive. This is the first fruit of almost a year's continuous labor during which time we have been organizing a cumulative index. The amount of reading, research and detail work involved in setting up such an index has been almost unbelievable. But we feel that our expenditure of time and effort will be more than amply repaid if our readers find the index useful.

Miss Mary C. Keedy, the compiler of the index, says that in the task of compiling and editing she is grateful for the kind assistance of the members of *The Cattleman* staff, particularly the editor, Henry Biederman, for his encouragement and direction; Marquise Moore and Isabelle Johnson for testing out the general usability of the index and helping in the selection of subject headings; J. S. Ibbotson and Mrs. J. L. Potter of the Fort Worth Public Library for technical advice and encouragement; Catherine Ellen Hurley for help in the task of reading copy and proof, tedious work requiring atomic exactness.

### KEY TO ABBREVIATIONS

ABBA—American Brahman Breeders Association
